Summary

Aspiring Data Engineer specializing in Data Engineering and Analytics, with experience architecting scalable data pipelines and delivering actionable insights. Proficient in SQL, Python, Snowflake, and Tableau, with strong problem-solving and collaboration skills to drive high-impact data solutions.

Skills

Technical Skills: Python, SQL, MySQL, Excel, Java, NumPy, Pandas
Developer Tools: Snowflake, Jupyter Notebook, Tableau, Power BI
Data Skills: ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Visualization, Statistical Analysis
Concepts: Query Optimization, SCD Type 2, Star Schema, RAG, Generative AI
Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Adaptability

Projects

Customer Order Analytics Pipeline | *Snowflake, SQL, Streams & Tasks, Tableau* **March 2026**

- Architected an end-to-end **Snowflake data pipeline** using **Medallion architecture** for scalable data processing.
- Engineered **incremental pipelines** using **Streams & Tasks**, reducing processing time by **30–40%**.
- Implemented **SCD Type 2** logic to ensure accurate historical tracking and improve data reliability.
- Developed a **star schema** and optimized queries using **Dynamic Tables**, achieving **25–35% faster performance**.
- Governed data security using **Row-Level Security (RLS)** and built **Dashboards** for decision-making.

Real Estate NFT AI Analytics Platform | *Python, Power BI, Random Forest* **November 2025**

- Developed an end-to-end real estate analytics platform using **Random Forest** for property price prediction.
- Built **ELT** pipelines to process and analyze real estate data for predictive modeling.
- Integrated an **NFT** marketplace using Solidity for secure digital property ownership and transactions.
- Created **Power BI** dashboards to visualize trends and support data-driven decision-making.

ESG Prism – Due Diligence Platform | *FastAPI, Next.js, RAG, Gemini API* **March 2026 – June 2026**

- Built an end-to-end **ESG due diligence platform** that generates **evidence-backed ESG scores and risk verdicts** for companies in under **30 seconds**.
- Designed a custom **RAG pipeline** in Python by chunking live web and PDF data, generating embeddings with the **Gemini Embedding API**, and ranking relevance using **cosine similarity** across five domain-specific ESG queries.
- Engineered a **FastAPI backend** integrating **live web search (Google Search grounding)**, PDF extraction, and a structured **LLM scoring rubric** to produce consistent and reproducible risk verdicts.
- Built and deployed a **Next.js frontend** with **real-time analysis and PDF report export**, deploying on **Vercel and Render** as part of a **two-member team** for InnovateZ 2026 (**Top 63 out of 600+ teams**).

Certifications

NPTEL Cloud Computing - May 2025 (NPTEL)

Applied Machine Learning in Python - November 2025 (Coursera)

Specialization in Machine Learning - April 2025 (Coursera)

Google IT Support Certificate - December 2025 (Google IT Skill)

Education

Vellore Institute of Technology 2023 – Present
B.Tech CSE (AI & ML), **CGPA: 8.28**

Nand Vidya Niketan 2015 – 2023
Secondary & Higher Secondary

Extra-Curricular Activities

Lead, Social Media Team | Mozilla Firefox Club November 2025 – Present
Led team to execute social media strategies; increased social media engagement by 35%. (Certificate)

Core Member | Entrepreneurship Cell August 2024 – September 2025
Organized and supported events to improve participation. (Certificate)
